# Its fun to play at home

## Cornflour!

You can buy corn flour from any supermarket for roughly 75p for 500g

### Other Ideas:

Only use a small amount to make the cornflour last longer.

Add colour/smell to make the cornflour more interesting.

Use cups, bowls, plates, spoons, forks, pans, old containers etc from the kitchen to pour & fill with.

Add a small amount of water to the cornflour.

Mix the water and cornflour together.

Play with the cornflour, pouring & filling bowls and containers, mixing with forks and spoons.

This will help your child to explore colour, texture, scent and language whilst having fun.

### Let's talk:

Sticky  
Smooth  
Feel  
Soft  
Drip  
Solid  
Runny
